FROM KEG TO GLASS

IN TUBING FOOD WE UNDERSTAND DISPENSING AS A WHOLE, THAT'S WHY WE ELABORATE PRODUCTS RELATED WITH EVERY PART OF THE DRAUGHT SYSTEM.

OUR AIM IS TO ENSURE YOU CAN DISPENSE YOUR DRINKS IN THE BEST WAY POSSIBLE.

ISSUE

2023 - 24

VERSION N 01-10-2023

— ABOUT US

Tubing Food was born in the mid-nineties in Barcelona, with the clear mission of helping people to relax and enjoy together a good beer or any other drink. Our part in helping with this objective is to ensure our customers they can serve their drinks in the best way possible.

We are totally focused on customer needs, working together to create the most suitable products and services for them, improving every day through knowledge sharing. We build strong relations with our customers, growing stronger every day thanks to an active listening policy.

Discover why most of our customers come back to us.

TUBING

food

INNOVATING FOR YOU

We are constantly developing **in-house technologies**, that allow us to maximize our production efficiency and give us the needed flexibility to create the most suitable product for you.

WE PLACE CUSTOMERS AT THE HEART OF THE PRODUCTION PROCESS

After more than two decades working side by side with our customers, we have developed a service that stands out:

Fast delivery

Product and service reliability

On time production

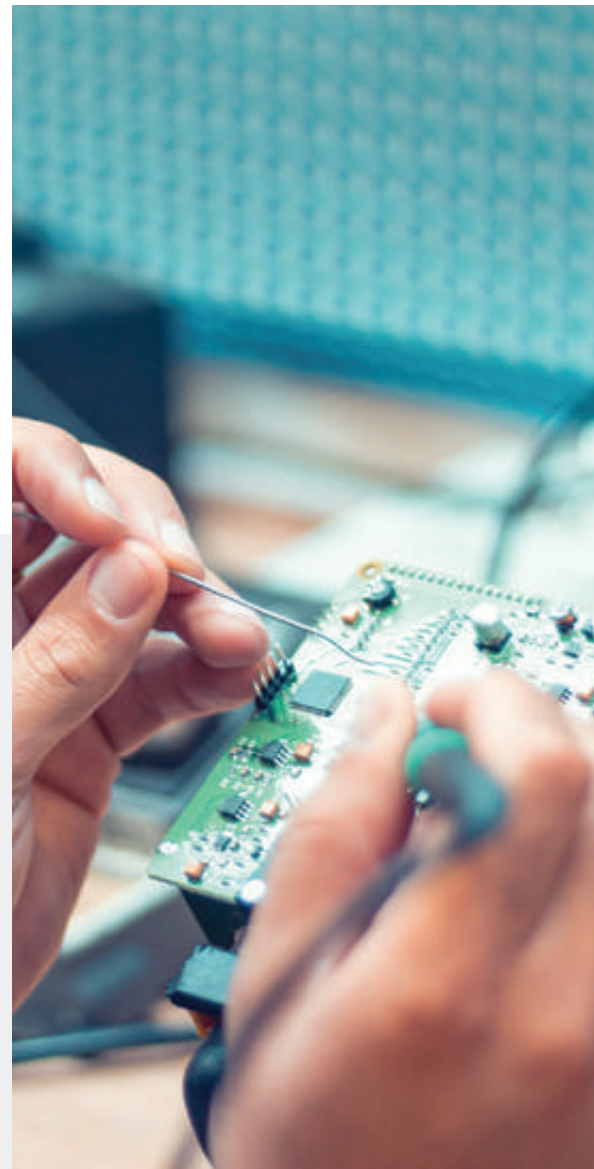

Flexible manufacturing process

Serving the quantity you need

Satisfying your requests

TUBING FOOD NOT ONLY MANUFACTURES A TUBE: WE PRODUCE A TUBING SYSTEM TOTALLY CAPABLE OF DISPENSING BEER OR ANY OTHER DRINK WITHOUT LOSING ANY OF ITS PROPERTIES.

Our tubes are obtained through the extrusion and co-extrusion processes of the plastics they are composed of. The combination of extruders, our own designed tools and computerized planning of production give us a high flexibility, resulting in total satisfaction with orders and delivery service.

Our productive process and the on-time production allows us to supply the exact quantity you need just when you want it.

(*) Inner layer material

**STANDARD FLOODED PYTHON**

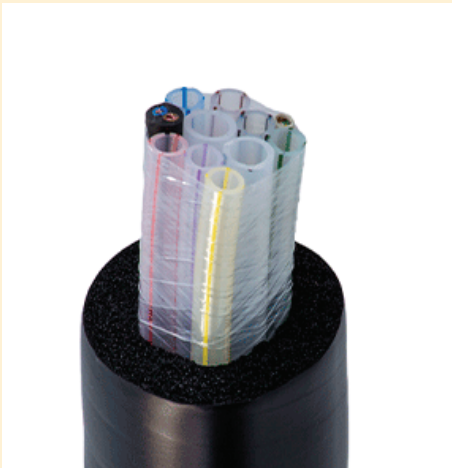

Python tubing that gets to maintain cold the product temperature through the inundation of a main tube with cold water in the circuit.

**CORRUGATED PYTHON**

Flooded python which has more flexibility thanks to the PVC corrugated tube that contains as a main tubing.

**STANDARD CONTACT PYTHON**

The standard contact python gets to keep the product temperature thanks to water re-circulation.

**PYTHON WITH ELECTRICAL CABLES**

Contact python with an electric cable with which we can illuminate the tower and the adjacent signs.

**PYTHON WITH DATA CABLE**

Contact python that allows data collection through a data cable.

**PYTHON WITH JACKET OR PVC TAPE**

Contact python with a jacket or a PVC tape specialized in preventing tube's condensation.

**PYTHON WITH ALUMINIUM FOIL**

Contact python which has added an aluminium foil between the cling film and the insulation. Preserves better the temperature.

PYTHON TYPES

P Y T H O N

THE “TUBING FOOD FORMULA” FOR PYTHON

More than a python, we have developed a heat exchanger system which is able to keep beer down to 0° and pour it into a glass below 2° using only water as re-circulation.

You can build pythons with the tubes you choose or, if you prefer, we can advise you about the system that best meets your needs. Our technologies developed in-house allows us to offer a huge flexibility of options:

- Make-to-order production
- From 1 up to 32 tubes per python
- Insulation from 4mm to 40mm
- Standard or “jacket” finish
- Aluminium foil
- Bundle python

CONNECTIONS TYPES

MINI PYTHON

RECIRCULATION

ELBOWS

CONNECTION AT ITS FINEST

Tailor-made products to ease and make more effective the connection between tubing and towers. We make all you need to install easily your dispensing lines and to assure there is no loss of product in the connection between tubes and the tower.

Our connection products are adaptable to all sizes of towers, making the most of every centimeter inside the tower.

BESPOKE TOWERS

A WORLD OF POSSIBILITIES IS COMPLETELY OPEN
TO YOU.

If you want an exclusive and personalized tower, we can design it just for you. We will work together in all the creative process steps, following your instructions, giving advice and sharing our experience. We will do everything that is necessary to find the tower that best fits your needs.

- Create a new tower from a basis or from scratch
- Choose finishes, shapes, materials, measures and all the tower's characteristics
- Try different taps, drip trays and glass rinsers

Some of the Be Spoke Towers you will see below, are exclusive products for other customers, so they are not available for sale. Those fonts in which you see a logo are exclusive, while, on the other hand, those columns in which you will see a badge that indicates "**design available**", **can be created for you as they are or with modifications.**

BESPOKE TOWERS

CERAMIC

Damm

MY STORY

Inspired by the Mediterranean character of Damm beer and the ancient craftsmanship of ceramics, the Ceramic tower is a risky bet due to its delicate figure that requires manufacturing through high precision work which is not easy to perform. Its groundbreaking design has been awarded.

BESPOKE TOWERS

COSMOS

MY STORY

Cosmos is the iconic tower of Estrella Galicia, the world-renowned Galician beer. Cosmos projects a recognizable image that transmits quality and functionality. It incorporates back lighting and is especially loved in bars for its easy maintenance.

BESPOKE TOWERS

MAGIC ROCK

MY STORY

The Magic Rock tower is the ideal font for dispensing the Magic Rock Brewing beers, a pioneering craft brewery in the UK. Solid, iconic and with characteristic features that transport us into a magical universe, the Magic Rock font, like its beer, is created to challenge customers to try new flavors that will inspire them to continue delving into their beer hobby.

BESPOKE TOWERS

BOO

MY STORY

Fine and contortionist, the Boo tower, that was designed by the Boo design studio, defies the classic standards of beer fonts thanks to its curvy figure. Manufactured exclusively for Ambar, the centennial beer from Zaragoza with a strong presence in Aragon, the Boo tower never goes unnoticed despite its subtlety and delicate shapes.

BESPOKE TOWERS

SAGRES

MY STORY 🍺

Cheerful and colorful, Sagres tower has been born to dispense the beer that transmits more and better the spirit of Portugal. At a glance, it transports you into a hot afternoon on the Portuguese coast while you enjoy with your friends a cold Sagres and an unforgettable summer.

BESPOKE TOWERS

ASPIS

RAIMAT

MY STORY

ASPIS is the name that the Greeks gave to shields. It is made of corten iron with laser marking and gold graphics.

An extensive text field to communicate. Illuminated and with the possibility of serving three different types of drinks.

BESPOKE TOWERS BRIDGE

MY STORY

The sailor nature of Bridge converts it into a unique product. Its detailed design and the good election of colors and materials, convert the Bridge tower into something more than a good option. It won't go unnoticed.

BESPOKE TOWERS

LINGOT

MY STORY

Pure lines, graphics and light. LINGOT is customizable and conveys a feeling of solidity that distinguishes it in any environment.

Elegant, masculine, simple.

A column that communicates and makes you fall in love.

BESPOKE TOWERS**MIRALL**MY STORY 

MIRALL blends into its surroundings and surprises you by showing a hidden dimension in which the brand's capital letter floats.

A special and very striking tower.

BESPOKE TOWERS

KARAT

MY STORY

KARAT is the epitome of luxury. Shines like a diamond and communicates sophistication.

For special and exclusive clients. A visual metaphor.

Diamonds are forever.

BESPOKE TOWERS

KLISI

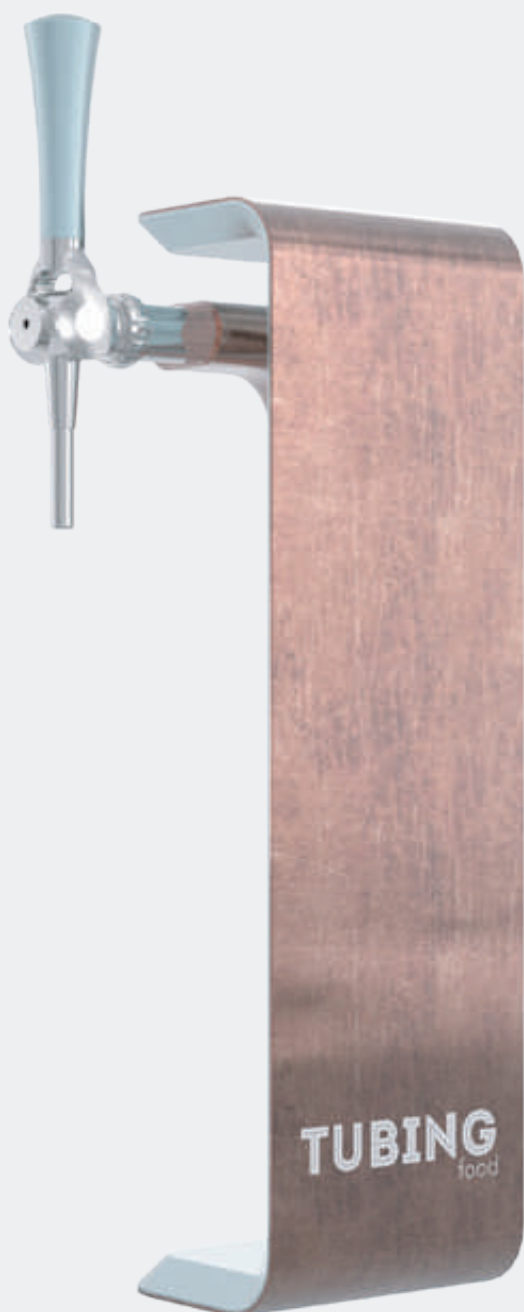

MY STORY

KLISI is the name that the Greeks gave to the springs of water.

This tower is made with resin and a finish that simulates corten steel and graphics, evokes the natural mountain watersheds.

BESPOKE TOWERS

HÖNDT

MY STORY 

This is a very delicate tower.

We can use different materials and finishes to accompany the image of your brand.

A subtle presence.

BESPOKE TOWERS

VESTA

MY STORY

In Roman mythology, Vesta was the goddess of the home. It was the symbol of fidelity.

Inspired by the shape of the arches of the client's cellars, this elegant and yet simple tower will dispense wines very efficiently.

BESPOKE TOWERS BARISTA

MY STORY

BARISTA has lateral communication surfaces to tell stories. It is built with noble materials, which differentiate it from traditional beer columns.

Originally designed for cider pouring could be adapted to your own beverage needs.

MODULITE

MODULAR TOWER CONCEPT

INNOVATE. DISPENSE. SUCCEED.

**Versatility at its finest**

Designed to completely renew the image of your fonts whenever you want, easy and affordable. Adapt your towers for events, festivals, different brands, campaigns... Personalised covers can be changed in less than a minute.

A sustainable tower

Modulite is made with recycled aluminium and is also recyclable.

Low cost of ownership

Keep the core, change the jacket: If a tower becomes damaged, Modulite allows you to change only the parts affected and not the entire tower.

MODULITE TOWER

MODULITE TOWER

The “chameleon” tower

Stop worrying about how your brand image updates will affect your towers, with Modulite you can solve it in a matter of minutes.

Everybody loves Modulite

Not only will customers enjoy Modulite's disruptive and changeable aesthetic, your service suppliers will love Modulite too for its lightness and ease of installation.

Your own design or we help createing it for you

Design your own font and we manufacture it for you, or if you prefer our team of designers will create the tower you've been waiting for.

**Quick install**

Due to its modular nature, Modulite is very easy to handle and therefore easy to install.

The sky is the limit: Infinite customisation options

Modulite gives you endless possibilities: Try different materials, shapes, measures... to create a distinctive and unique tower that fits into any environment.

**Fast delivery**

Thanks to the modular design of Modulite and Tubing Food's service, you will have your towers delivered in no time.

Suitable for all

Beer, water, wine, juices... any drink that is dispensed on draft can benefit from the advantages and the adaptable looks of Modulite.

BESPOKE TOWERS

BALIZA

The Baliza tower is an elegant option for dispensing from one to three beer brands. Its consistent shapes will communicate with complete clarity the values of your brand. The integrated logo in the header and the lighting that comes from the top down create a great impact in any environment. Baliza will certainly be the centre of attention wherever it is.

INNOVATE.
DISPENSE.
SUCCEED.

STANDARD TOWERS

DESIGN AND FUNCTIONALITY.

In Tubing Food we produce towers that will make a great first impression on customers. Our design department is able to create amazing towers from scratch or following your guidelines, so that the final product is not only functional, but also transmits the values of the brand, its identity and attitude.

DETAIL ORIENTED.

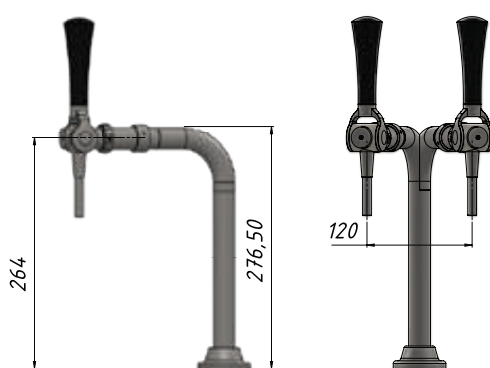

Materials, finishes, shapes and engravings: in Tubing Food we take care of every single detail when we design and produce our towers. Small details make a big difference.

**WE ARE
DISPENSING EQUIPMENT
MANUFACTURERS**

CONTROL SYSTEMS

DISPENSING CONTROL SYSTEMS ARE BORN TO SOLVE PROBLEMS RELATED WITH TANKS AND KEGS IN STORES AND TO FACILITATE WORK AROUND DISPENSING INSTALLATIONS.

Help your technical service, logistics and marketing departments to manage tanks and beer kegs efficiently: Simplify installations and changes, make more efficient your logistics planning thanks to consumption data collected, analyze real time data to know what products are performing well and what don't, prevent future quality problems controlling your installations status and facilitate work to baristas and maintenance team thanks to the collected information.

What solutions does **Autotank**

Autotank is the most advanced tank dispensing control system of the market: *Thanks to Autotank, you will know in real time the stock of all your tanks, the state of the beer inside them or if any tank must be checked because of incorrect changes. You will be able to create alarms when a tank must be refilled, when a problem is about to happen and much more.*

Discover it:

Stock control to optimize logistics

Autotank helps with tank stock management thanks to the control of the volume consumed in real time and the recharge input. Thanks to this, you will be able to plan the recharging of the tanks in advance in all your bars. Don't leave any sales outlets without beer, it will arrive just when needed.

Data analysis

Collection of key information to make decisions based on data. Control in real time the basic information for your business. Dashboard with clear and personalized KPI, which will help you detect quickly and simply what is happening in different sales outlets.

Keep your quality standards

Foresee future problems of product quality by controlling temperature, pressure and the correct functioning of the most important components of the cooler: stirrer motor, compressor, ventilator and global consumption of the installation. The alarm will always warn you of undesirable situations. Schedule the cleanings CIP and control its deviations. Solve problems before they happen.

Status control of your tanks in real time

Has a tank been changed before time? Has beer remained inside the tank for too long? No problem! With Autotank, you will easily detect these circumstances and many others, in this way you will achieve a significantly waste reduction and, in a short term, you will increase profitability.

Automatic or semiautomatic tank change

Let Autotank administer the changing of tanks automatically or decide yourself when the tank needs to be changed. In this way, the bar personnel will gain time to attend their customers at the same time that potential human errors are reduced. Manage errors remotely.

has to offer?

Functionalities

CONNECTIVITY

- *Information in real time*
- *Consumption control*
- *Control and administration of tanks remotely*

SOFTWARE

- *Stock control*
- *Control of tank status*
- *Automatic and semiautomatic change of tanks*
- *KPI Dashboard Data analysis*

ALARMS

Alarm configuration:

- *Temperature*
- *Pressure*
- *Volume*
- *Cleaning cycle*
- *Cooler components*

**Alarms without limit*

**Totally configurable by the user*

Characteristics & components

TEMPERATURE CONTROL

Autotank takes the temperature:

- *Of the product when leaving the tank*
- *Of the refrigeration water at the entrance and the exit of each tank.*

PRESSURE CONTROL

Measures the thrust pressure inside the tank.

CONSUMPTION CONTROL

With Autotank you will be able to control the volume consumed by each of your tanks individually.

COOLER PERFORMANCE

Autotank controls the operational hours of the refrigerator and warns you if the cooler stops.

AUTOMATIC CLEANING DETECTION

With Autotank you can detect and analyse cleanings completely autonomously, without user intervention.

KEG DISPENSING CONTROL SYSTEM

Keg control is the most advanced keg beer dispensing control system.

With Keg Control, you will know in real time the dispensed volume of every beer on every store, configure alarms that will warn you when a problem (like hot beer) is about to happen and much more.

Discover it:

Data analysis

Collection of key information to make decisions based on data. Control in real time of basic information like consumption by product. Data dashboard with clear KPI to detect easily what is happening on premises.

A key help for your logistics optimization

Control in real time the beer consumption of every bar. Add consumption data to your ERP and optimize your logistics.

Keep your quality standards

Predict product quality issues controlling: temperature, pressure, line cleaning, the cooler and its components.

A key support for your maintenance team

Create customized alarms that warn you when problems are close to happening, avoid unnecessary maintenance visits and schedule them only when they are really needed.

Easy to work with

Keg Control has a very intuitive system. We train your different teams how to install and to solve any problem.

Maximize the profitability of your kegs

Functionalities

CONNECTIVITY

- Information in real time
- Consumption control
- KPI dashboard

ALARMS

Alarm configuration:

Temperature

Pressure

CO2

Line cleaning

Cooler: Stirrer motor, fan, compressor.

* Schedule cleaning visits

SOFTWARE

- Temperature control
- CO2 level
- Pressure control
- Line cleaning status
- Cooler performance

Features & components

TEMPERATURE CONTROL

Keg Control measures the temperature anywhere you need: inside the ice bank, in the line or under the bar, close to the font.

CONSUMPTION CONTROL

Each Keg Control allows you to connect up to 4 flowmeters (expandable to a maximum of 16 flow meters interconnecting 4 keg modules).

PRESSURE CONTROL

Measures the pressure inside the keg to determine the remaining CO2 level.

COOLER PERFORMANCE

Keg Control has two sensing inputs for energy consumption: it controls the operation hours of the cooler.

— TUBING FOOD TEAM

WE INVEST IN HUMAN POTENTIAL

In Tubing Food we have the strong conviction that the key for our success lies in our team, that's why:

PROFESSIONAL DEVELOPMENT

We are committed to the development, participation and formation of the people in our team.

GREAT VALUE

We build labor relations that provide great value in both directions: from company to worker and from worker to company.

SECURITY

We promote and implement labor conditions that bring us to elevated security and healthy conditions for our workers, preventing risks derived from their activities

ENVIRONMENT

We implement best practices in our processes, reducing environmental impact and making an efficient use of our resources.
